**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I**, claims 1 and 71-81, drawn to methods of qualifying a reflective optical element.

**Group II**, claims 82-91, drawn to an EUV lithography apparatus.

2. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

**Group I** claims measuring at various wavelengths and/or various incidence angles of the radiation a reflectance and a photoelectron current induced by the radiation in an area of the free interface resulting in (a) a reflectance curve as a function of wavelength and/or incidence angle wherein the reflectance curve has a wavelength region of maximum reflectance and/or an incidence angle region of maximum reflectance; and (b) a photoelectron current curve as a function of wavelength and/or

incidence angle wherein the photoelectron current curve has a profile within the wavelength region of maximum reflectance and/or the incidence angle region of maximum reflectance, which is not found in any other group.

**Group II** claims a EUV lithography apparatus, which is not found in any other group.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case.

Art Unit: 2882

Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
